

# RAVI SINGH KALAKOTI

Senior Python Django Developer | BI & Data Visualization  
Noida, India • +91 7060474650 • ravikalakoti16@gmail.com • [LinkedIn Profile](#)

## PROFESSIONAL SUMMARY

---

Senior Python Django Developer with 5+ years of experience building scalable RESTful APIs, high-availability web applications, and data-intensive systems. Proficient in Django REST Framework, PostgreSQL, AI-driven workflows, and AWS. Skilled in Power BI dashboard development with hands-on experience creating interactive reports for HR analytics, travel platforms, legal tech, and security management. Adept at bridging backend engineering and business intelligence to deliver actionable insights for stakeholders.

## TECHNICAL SKILLS

---

**Backend:** Python, Django, Django REST Framework (DRF)

**Frontend:** HTML, CSS, JavaScript, Bootstrap, AJAX

**Databases:** PostgreSQL, MySQL, SQLite

**Business Intelligence:** Power BI (DAX, Power Query, Data Modeling, Interactive Dashboards, KPI Reports)

**AI / ML & Automation:** AI Agents (Tool-based), AWS Bedrock, Prompt Engineering, Workflow Automation

**API & Integrations:** RESTful APIs, Razorpay, ShipRocket, Mixpanel, ConvertKit, HubSpot, OAuth

**Tools & DevOps:** Docker, AWS S3, Azure, Git, CI/CD Pipelines, Unit Testing

**Analytics:** Mixpanel, Push Notifications, Data Visualization

## POWER BI & DATA VISUALIZATION

---

- Hands-on experience building dashboards for HR analytics, sales tracking, and user behavior reporting
- Familiar with DAX formulas including SUM, COUNT, CALCULATE, and time-intelligence functions
- Experience with Power Query (M language) for data cleaning and transformation
- Connected Power BI to PostgreSQL databases — directly relevant to existing Django backend projects
- Designed data models with table relationships and KPI visuals for business stakeholder reporting

## PROFESSIONAL EXPERIENCE

---

**Technoarch Softwares Pvt. Ltd. | Senior Python Django Developer** *Dec 2020 – Present*

- Architect and maintain high-performance RESTful APIs using Django REST Framework for enterprise applications
- Design and optimize complex database schemas in PostgreSQL and MySQL to ensure data integrity and speed
- Lead deployment of scalable web applications prioritizing security and high-availability architecture
- Integrate third-party APIs and secure payment gateways (Razorpay, ShipRocket) to enhance platform functionality
- Designed AI-driven backend workflows and agent-based systems to automate data extraction and personalization
- Develop Power BI dashboards to visualize application metrics, user behavior, and business KPIs for stakeholder decision-making
- Collaborate with UI/UX teams to implement frontend enhancements that improve user retention and experience

## KEY PROJECTS

---

### 1. TripSpark — AI-Powered Travel Planning Platform

- Developed a travel planning platform where users share any URL to auto-generate a travel board and itinerary

- Designed agentic backend workflow using a tool-based AI agent to extract trip data and create structured itineraries
- Implemented push notifications to deliver itinerary updates, reminders, and real-time trip alerts
- Built Power BI dashboards to analyze user engagement, popular destinations, and travel pattern trends

**Tech Stack:** *Python, Django, DRF, PostgreSQL, AI Agent (Tool-based), Third-party APIs, Push Notifications, Power BI*

## 2. Breadkrumb — Mobile Travel Application (iOS & Android)

- Developed iOS and Android travel app with a scalable backend built using Django REST Framework
- Implemented OAuth-based authentication and authorization for secure user login and third-party sign-ins
- Integrated Mixpanel for user behavior analytics and ConvertKit for automated engagement workflows
- Built an AI-powered chat interface to assist users with travel planning and personalized itinerary suggestions
- Created Power BI reports to track user acquisition, retention metrics, and feature adoption across mobile platforms

**Tech Stack:** *Python, Django, DRF, PostgreSQL, OAuth, Mixpanel, ConvertKit, AI Chat Interface, AWS SES, S3, Bedrock, Power BI*

## 3. Contrax — Legal Tech Platform for Real Estate

- Developed a legal tech platform to streamline real estate transactions and contract lifecycle management
- Implemented secure document uploads, approval workflows, and audit logs for compliance and traceability
- Designed Power BI dashboards for contract status tracking, workflow efficiency, and compliance reporting

**Tech Stack:** *Django, DRF, PostgreSQL, REST APIs, HubSpot APIs, WebSocket, Power BI*

## 4. Veridoc HR — HR Management System

- Built a comprehensive HR system with automated timesheets, attendance tracking, and payroll reporting
- Developed real-time HR analytics dashboards using Power BI with direct PostgreSQL data connections
- Created DAX measures for workforce KPIs including headcount, attrition rate, and attendance trends

**Tech Stack:** *Python, Django, DRF, PostgreSQL, Power BI, Docker, Azure*

## 5. United Global Security — Real-Time Security Management

- Built a real-time security management application for incident reporting, shift scheduling, and guard tracking
- Enabled operational dashboards and real-time updates to improve incident response and team coordination
- Developed Power BI visualizations for incident trends, response times, and workforce allocation

**Tech Stack:** *Django, JavaScript, PostgreSQL, REST APIs, SQLite3, Power BI*

## KEY ACHIEVEMENTS

---

- Successfully delivered 5+ production-ready applications across travel, HR, legal tech, and security domains
- Reduced API response times by 40% through database optimization and query performance tuning
- Implemented AI-driven automation reducing manual data processing time by 60%
- Maintained 99.9% uptime for critical enterprise applications through robust architecture and monitoring

## EDUCATION & CERTIFICATIONS

---

### B.Tech / B.E. — Dev Bhoomi Institute of Technology & Engineering

#### Certifications:

- Python Programming (Advanced)
- Django Framework (API Development & Security)
- Data Science & Analytics
- Power BI for Data Visualization and Business Intelligence

## LANGUAGES

---
