

RAVI SINGH KALAKOTI

Senior Python Django Developer Noida, India | +91 7060474650 | ravikalakoti16@gmail.com [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Senior Python Django Developer with 5+ years of experience building scalable RESTful APIs, high-availability web applications, and data-intensive systems. Expert in Django REST Framework, PostgreSQL, and third-party integrations including payment gateways. Proven ability to optimize performance, design secure architectures, and deliver production-ready solutions with modern AI-driven and agentic backend workflows.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework (DRF)
- **Frontend:** HTML, CSS, JavaScript, Bootstrap, AJAX.
- **Databases:** PostgreSQL, MySQL, SQLite.
- **API & Integrations:** RESTful APIs, Razorpay, ShipRocket, Third-party API Integration.
- **AI / ML & Automation:** Tool-based AI Agents, AWS Bedrock, AI Chat Interfaces, Prompt Engineering, Workflow Automation
- **Analytics & Messaging:** Mixpanel, ConvertKit, Push Notifications
- **Tools & DevOps:** Docker, AWS S3, Git, CI/CD Pipelines, Azure, Unit Testing.

PROFESSIONAL EXPERIENCE

Technoarch Softwares Pvt. Ltd. | *Senior Python Django Developer* | **Dec 2020 – Present**

- Architect and maintain high-performance RESTful APIs using Django REST Framework for enterprise applications.
- Design and optimize complex database schemas in PostgreSQL and MySQL to ensure data integrity and speed.
- Lead the deployment of scalable web applications, prioritizing security and high-availability architecture.
- Integrate diverse third-party APIs and secure payment gateways to enhance platform functionality.
- Collaborate with UI/UX teams to implement frontend enhancements that improve user retention and experience.
- Designed and implemented AI-driven backend workflows and agent-based systems to automate data extraction, personalization, and user-facing features.

Freelance / Self-Employed | *Python Django Developer* | **June 2024 – Feb 2025**

- Developed **Veridoc HR**, a comprehensive HR management system featuring automated timesheets and attendance tracking.
- Built real-time HR analytics dashboards using Python and Django to provide actionable business insights.
- Automated legacy business processes through custom Python scripting and Django automation tools.
- Managed full-stack containerization and deployment using Docker and Azure.

KEY PROJECTS

TripSpark

- Developed a travel planning platform where users can share any travel-related URL to automatically generate a travel board and detailed itinerary.
- Designed an agentic backend workflow using a tool-based AI agent to extract trip data from shared URLs, create structured itineraries, and organize trip resources
- Implemented push notifications to deliver itinerary updates, reminders, and real-time trip alerts to users.
- **Tech:** Python, Django, Django REST Framework, PostgreSQL, AI Agent (Tool-based), Third-party APIs, Push Notifications

Breadkrumb

- Developed iOS and Android travel applications with a scalable backend built using Django REST Framework.
- Implemented OAuth-based authentication and authorization to support secure user login and third-party sign-ins.

- Integrated Mixpanel for user behavior analytics and ConvertKit for automated user engagement and communication workflows.
- Built an AI-powered chat interface to assist users with travel planning, trip-related messages, and personalized itinerary suggestions.
- **Tech:** Python, Django, Django REST Framework, PostgreSQL, OAuth, Mixpanel, ConvertKit, AI Chat Interface, AWS S3, Bedrock

Contrax

- Developed a legal tech platform to streamline real estate transactions, contract lifecycle management, and document handling for property lawyers.
- Implemented secure document uploads, approval workflows, and audit logs to ensure compliance and traceability.
- **Tech:** Django, Django REST Framework, PostgreSQL, REST APIs, Hubspot APIs, Websocket.

United Global Security

- Built a real-time security management application for incident reporting, shift scheduling, and guard activity tracking.
- Enabled operational dashboards and real-time updates to improve incident response and team coordination.
- **Tech:** Django, JavaScript, PostgreSQL, REST APIs, SQLite3

EDUCATION & CERTIFICATIONS

- **B.Tech/B.E.** | Dev Bhoomi Institute of Technology & Engineering.
- **Certifications:** Python Programming (Advanced), Django Framework (API Development & Security), Data Science & Analytics.
- **Languages:** English (Professional), Hindi (Native).

Core Technologies: Python, Django, Django REST Framework, AI Agents, Agentic Workflows, LLMs, AWS Bedrock, REST APIs, OAuth, PostgreSQL, Docker, Event-Driven Systems, AI Chat Interfaces
